BUET · IPE 105

4-Day Rescue Roadmap

Cost & Management Accounting

Zero theke A+ (CGPA 4.00) target | 31 October → 5 November 2026

4 din baki	**15** topic (question bank)	**208** solved questions, 13 papers	**168+** /210 = 80% (A+ target)

Ei guide-e ki ache

- Part 1 – Reality check, exam blueprint, complete strategy
- Part 2 – Topic-wise priority list + Must / Important / Optional / Skip
- Part 3 – Day-wise roadmap + hour-by-hour routine (31 Oct → 5 Nov) + daily completion targets
- Part 4 – Topic playbooks (kotha theke porbo, concepts, formulas, problem types, question types, practice list)
- Part 5 – Formula & concept checklist, practice-problem master list
- Part 6 – 4 November revision strategy, exam-hall strategy, "if you fall behind" rules

Source: tomar 3ta file – (1) IPE-105 Topic-wise Questions & Worked Answers (253 pp), (2) IPE 2009-25 past papers (117 pp, scanned originals), (3) Garrison, Managerial Accounting 16e (817 pp). Plan-er shob number (marks-weight, repeat-pattern) ei file-gulo theke ber kora.

Part 1 · Reality check & strategy

Direct kotha: zero theke 4 din-e **80%+ (A+)** ambitious, kintu **impossible na** – karon ei exam **extremely repetitive**. Tomar kaj 15 topic "sob jana" na; kaj holo **8ta high-weight topic-er "recipe" muscle-memory-te ana** ebong baki gulo-te basic marks tola. Plan-ta ei basis-e banano.

1.1 Exam kemon hoy (past papers theke)

Item	Ki pawa gelo
Format	Full marks **210**, time **3 hours**, **Section A + Section B** (alada script). Prottek section-e **4 question, any 3** (≈ 35 marks each). 2022-23-er question paper-e **Q1 (Sec A) ar Q5 (Sec B) compulsory** chilo → **notice/teacher-er kache confirm koro** ei bochor-o ache kina.
Question style	Prottek question-e 2-3 ta part: ekta **20-25 mark numerical** + ekta **10-15 mark numerical/short** + kokhono **5-10 mark theory**.
A+ threshold	BUET scale-e 80%+ = 4.00 (**confirm koro**). 210-e **168**. Mane 6 ta question-e gorhe ~28/35 – tai "3 question puro sothik" + clean presentation dorkar.
Calculator	Numerical-heavy. **Scientific calculator-e STAT (A+BX) mode** ekbar practice kore nao (high-low / regression-er jonno).

1.2 Tin-ta decisive insight

- **Same case, abar abar.** Question bank-er 195 entry-r moddhe **17 ta case** 2-3 ta alada bochore hubohu repeat hoyeche (38 entry): PEM CVP (2017-18, 2021-22, 2024-25), High Desert Pottery job-order, Thermal Rising ABC, Selzik FIFO, Cooperative San Jose, Via Gelato, McKenzie Sales, Lynch/Tami's absorption costing, Feather Friends, Come-Clean. Baki question-gulo-o prai *same type, notun number*. → **Past-question practice = best ROI.** Textbook cover-to-cover porar dorkar nei (817 page!).
- **Paper-er blueprint prai fixed.** Last 3 bochor-er structure niche (1.3). Mane tumi jaan kon slot-e kon dhoroner problem ashbe.
- **Recent trend shift:** Fin. ratios/ROI (42 → 41 → 50 marks), Relevant costs (70, 35, 30), Flexible budget (15-20) ar Capital budgeting (15) **bar bar** ashche. Purono bochor-e COGM/high-low beshi chilo, ekhon prai nei – tai oi duto *foundation* hishabe porbo, depth-e na.

1.3 Paper blueprint – last 3 papers (2022-23 · 2023-24 · 2024-25)

Slot	2022-23	2023-24	2024-25
A-Q1	Master budget 20 + ROI/divisional 15	Master budget 20 + Performance measures (MCE) 15	Master budget 20 + Financial ratios 15
A-Q2	ABC 20 + Flexible budget 15	Std variances 20 + Flexible budget 15	Flexible budget 20 + Capital budgeting (IRR) 15
A-Q3	Relevant costs 35	ABC 20 + Relevant costs 15	Std variances 20 + Relevant (drop dept) 15
A-Q4	Relevant costs 35	Relevant (bottleneck) 20 + Capital budgeting 15	ABC 20 + Relevant (special order) 15
B-Q5	Cost concepts 6 + Cost behavior (high-low) 14 + 15	Cost concepts 10 + Financial ratios 25	CVP theory 8 + Cost concepts 12 + Var/Abs 15
B-Q6	Job-order 20 + Process 15	Cash-flow theory 6 + Job-order 22 + Process theory 7	Job-order 20 + Process (FIFO) 15
B-Q7	Process theory 8 + Ratios 22 + Cash-equiv. 5	CVP 5 + CVP 25 + Op. leverage 5	CVP 25 + McKenzie (ratio analysis) 10
B-Q8	CVP 20 + Var/Abs 15	Var/Abs 18 + 7 + Ratios theory 10	Ratios 5 + Castile ratios 20 + Var/Abs theory 10

Note: 2023-24 & 2024-25-er section-wise rule (compulsory/any-3) ei file-gulo-te scan-e nei; 2022-23 header-e chilo. Tai exam-er age notice dekhe nio.

Implication: Section A-te Master budget (Q1) + Relevant/ABC/Std/Flex theke 2 ta; Section B-te Job+Process (Q6), CVP (Q7) ar Var/Abs (Q8) – ei **8 ta numerical topic** dhorle tumi 6 ta question-ei "safe" thakbe.

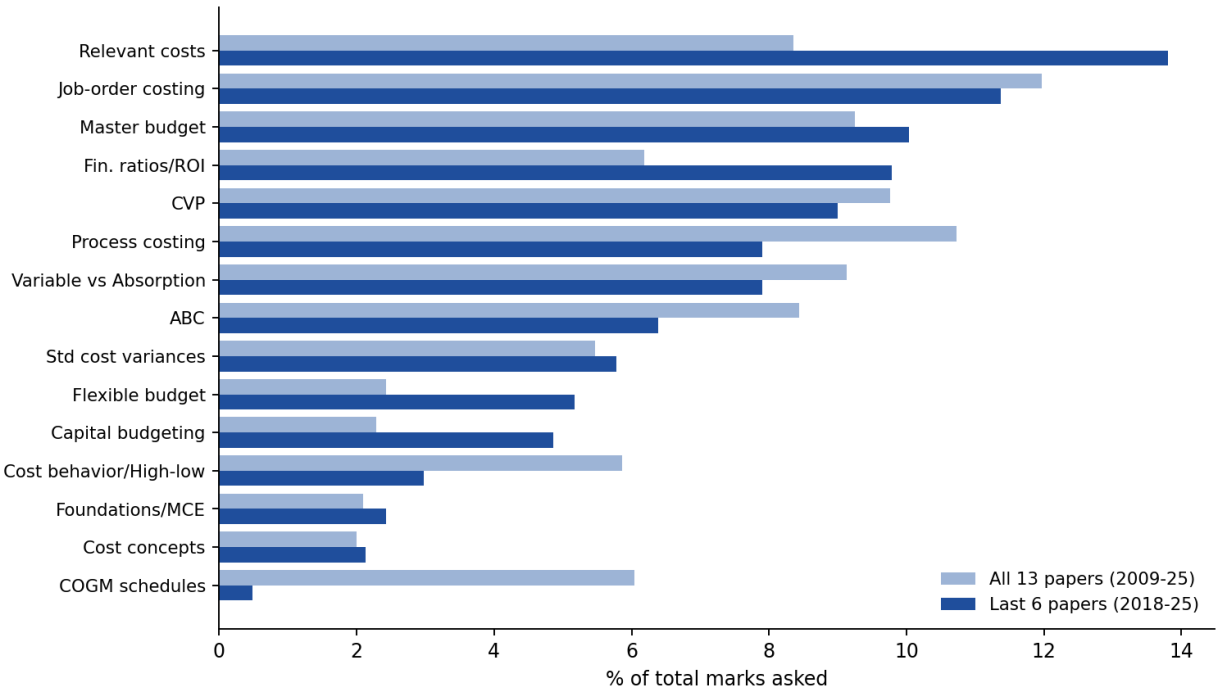

1.4 Strategy in one page

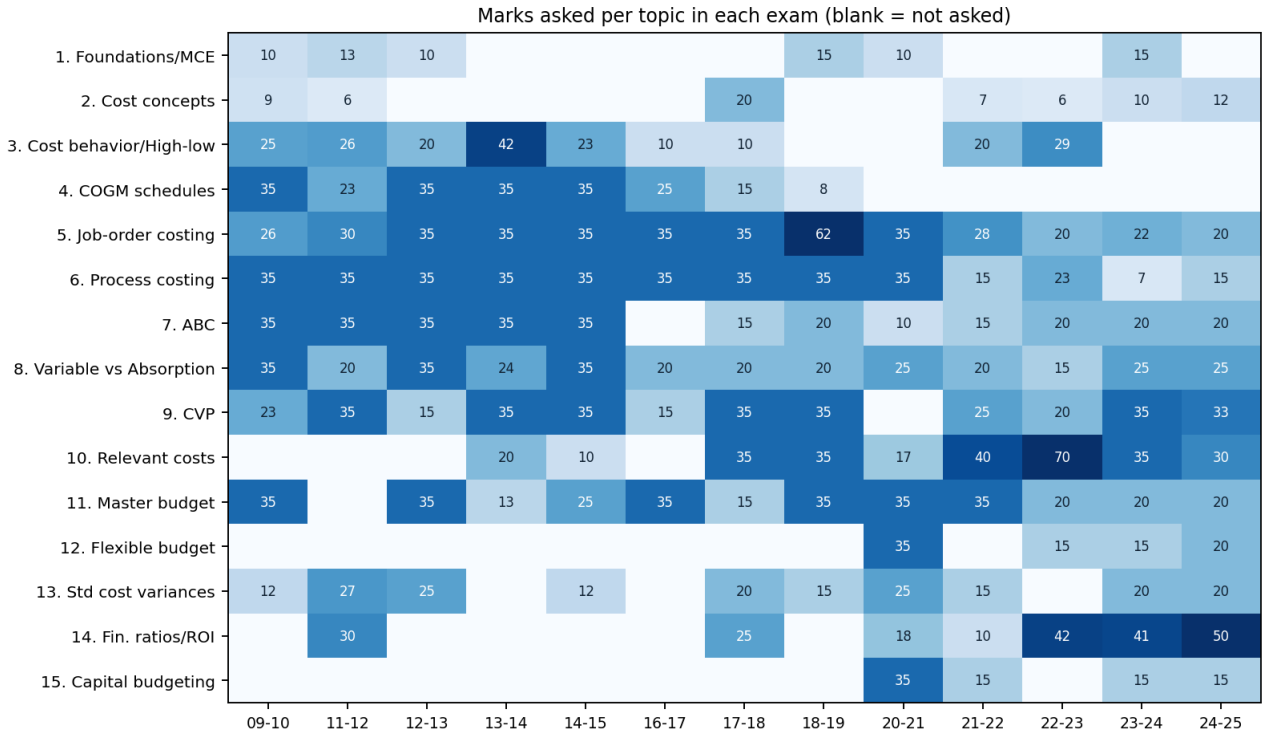

Principle	Mane ki
Recipe-first learning	Beginner-der jonno theory-reading slow. Prottek topic-e: (i) 15-20 min-e concept skim, (ii) ekta **worked answer porba**, (iii) answer dhoke **nijei same problem solve**, (iv) porer problem **blind** solve. Sob topic-e ei loop.
60% solving, 25% worked answers, 15% concept	Time-er majority problem solving-e. Garrison theke sudhu: chapter-er exhibit/summary + *Review Problem*. Pura chapter pora **banned**.
Oldest → newest	Practice-e **purono instance age**, latest instance (2023-24, 2024-25) **mock-er jonno reserve**. Then mock-e same case ashle tumi dekhbe repeat-er power.
Error log	Prottek bhul 1 line-e: topic / bhul-er dhoron (concept · formula · arithmetic · reading) / sothik way. Nov 4-er revision-er 40% ei log theke.
Daily recall	Prottek raat-e blank page-e us-din-er formulas **memory theke** lekho (20-30 min). Eta recognition-ke recall-e convert kore.
Sleep protected	Kom-pokkhe 7 ghonta ghum. Exam-er age raat-e jaga = marks-e bhul + formula-bhul. Plan-e eta hisab kora ache.

Honest expectation. Zero base theke 4 din-e 4.00 mane tomake **prai ekta full-focus, phone-off, 11-12 ghonta/din** dite hobe. Jodi kono din tai na-o hoy, niche **"cut ladder" (Part 6)** ache – kon jinis kata jabe, kon jinis kokhono na. Even jodi 4.00 miss hoy, ei plan-er result tomar previous exam-er cheye onek upore jabe.

Part 2 · Topic-wise priority list

Marks-weight: question bank-er 13 ta paper theke (2009-10 → 2024-25). Daan-dike: sob samoy-er weight; dan-dike: last 6 paper-er weight. Heatmap-e dekho kon topic **protibar** ashe.

(Marks ~ approximate; question bank-e multi-part entry merge kora. Tobu relative picture ekdom clear.)

2.1 Priority table (kon topic age, koto time)

#	Topic	Tier	Avg marks / paper (last 3)	In last 6 papers	Time dibe	Kobe
5	Job-order costing	**A**	21	6 / 6	4.25 h	Oct 31
10	Relevant costs	**A**	45	6 / 6	4 h	Nov 2
14	Fin. ratios / ROI	**A**	44	5 / 6	3.5 h	Nov 3
11	Master budget	**A**	20	6 / 6	4 h	Nov 2
9	CVP	**A**	29	5 / 6	4 h	Nov 1
8	Variable vs Absorption	**A**	22	6 / 6	4 h	Nov 1
6	Process costing	**A**	15	6 / 6	4 h + 0.75 FIFO	Nov 1 / Nov 3
7	Activity-based costing	**A**	20	6 / 6	2 h	Nov 2
13	Std cost variances	**B**	13	5 / 6	1.75 h	Nov 3
12	Flexible budget	**B**	17	4 / 6	1.25 h	Nov 3
15	Capital budgeting	**B**	10	4 / 6	1.5 h	Nov 3
3	Cost behavior / High-low	**B**	10	2 / 6	0.75 h	Oct 31
2	Cost concepts	**B**	9	4 / 6	2 h (+COGM)	Oct 31
4	COGM schedules	**B**	0	1 / 6	included	Oct 31
1	Foundations / MCE	**C**	5	3 / 6	0.5 h	Nov 3

Tier A = must-master (numerical, almost every paper). **Tier B** = important, short-to-learn or foundation. **Tier C** = quick theory only. Read order: **foundation (Cost language, COGM) → Job-order → CVP → Var/Abs → Process → Relevant → Budget → ABC → Ratios → Std → Flex → CapBud.** Ei order-ta dependency maintain kore (cost language → job costing → CVP → absorption).

2.2 Must-study · Important · Optional · Skip

Category	Items	Kano
MUST-STUDY (~75% marks)	Job-order costing (POHR, under/over, journal) · Process costing weighted-average · CVP (BE, target profit, MOS, DOL, what-if) · Variable vs Absorption (income + reconciliation) · Relevant costs (drop, make/buy, special order, constraint, sell/process further) · Master budget (production, materials, cash budget) · ABC (2-stage rates, product/customer cost) · Financial ratios & ROI/Residual income	Prottek paper-e 120+ marks eder theke. Eder bhul = grade drop.
IMPORTANT	Std cost variances (6 basic variances) · Flexible budget & performance report · Capital budgeting (NPV, IRR, payback) · Process costing FIFO (1 problem) · Cost classification & COGM schedule (foundation) · High-low method / cost formula · Short theory (master budget diagram, ABC benefits/limits, job vs process, var vs abs, relevant/sunk/opportunity cost, operating leverage, MCE)	Last 3 paper-e 15-20 mark kore, learn-e easy. 2-3 question puro korte parle A+ safe.
OPTIONAL (shesh-er dike, jodi time thake)	Std variance "missing data" (reverse) problems (Q181, Q186) · IRR interpolation · Least-squares regression by hand · Discounted payback · Cash-flow statement theory (3 sections) · Balanced scorecard (3 lines) · ABC theory: benefits/limitations/steps (10 marks)	Occasionally ashe, kintu time-poor hole age bad.
SKIP (4 din-e na)	Garrison Ch11 beyond ROI/RI (transfer pricing, segment margin) · Ch6 segment reporting · Statement of cash flows *preparation* (indirect method) · Joint products & byproducts · Spoilage in process costing · Cost-flow appendices · Lean/JIT/ethics essays · Regression mathematics · Textbook end-of-chapter "Cases"	13 bochor-er bank-e **kothao numerical-e nei** ba ekdom rare. Time-er opochoy.

Syllabus assumption: tumi alada syllabus-list dao ni; tai question bank-er 15 topic = tomar course syllabus dhore niyechi (Garrison Ch1-5, 6-15 ar relevant parts). Jodi teacher kono topic out/in kore thake, oi block-er time shift koro; plan-er structure ekoi thakbe.

Part 3 · Day-wise roadmap

Date	Theme	Topics	Study hours	Output by night
31 Oct (Sat) Day 0	Foundation sprint	Cost language · COGM · **Job-order costing** · High-low	~7.5 h (afternoon start)	6 problems solved · 1-page formula sheet #1 · error log started
1 Nov (Sun) Day 1	Profit & product-cost engine	**CVP → Variable vs Absorption → Process costing (WA)**	~12 h	12 problems · formula sheet #2 · theory short answers
2 Nov (Mon) Day 2	Decisions & planning	**Relevant costs → Master budget → ABC** + mixed retrieval	~12 h	12 problems · master-budget diagram · formula sheet #3
3 Nov (Tue) Day 3	Control & finance + first mock	**Fin. ratios/ROI** → Std variances → Flex budget → Capital budgeting → FIFO → **Mock 1**	~12 h	Syllabus 100% touched · Mock 1 scored · error log 25+ lines
4 Nov (Wed) Revision	Recall, repair, mock 2	Formula blank-page recall · error-log re-solve · 1-problem-per-topic round · **Mock 2** · theory sprint	~10 h	All formulas from memory · weak topics fixed · bag ready
5 Nov (Thu) Exam	Calm execution	Only formula scan (no new problem) → exam hall plan (Part 6)	40 min	168+ marks

Standard study block (prottek 2-hour block-er shape)

Minute	Ki korbe
0 – 20	**Concept skim:** Garrison exhibit/summary + Q&A-er sobcheye choto worked answer. Shudhu *recipe* bujho: input ki, step ki, output ki.
20 – 30	**Formula sheet-e lekho** (hat-e, A4 page). Jei formula likhle, ekta line-e example-o lekho.
30 – 55	**Guided problem:** worked answer dhoke diye ekta problem nijei solve; ekta kore line match koro.
55 – 105	**Blind problems:** 2 ta problem timer diye (20-25 min each). Answer dekho na jotokkhon na shesh hoy.
105 – 120	**Check + error log:** bhul-gulo 1 line-e log. Block-er recipe 5 line-e mukhe bolo.

Hour-by-hour routine

Samoy tomar ghum-ghum-r sathe adjust koro, kintu **block-er order ar duration** thik rakho. Break gulo skip korba na – 10-15 min-er break na nile 3rd block-er output half hoye jay. Prayer/meal gap gulo already dhora ache. Phone: study block-e **flight mode** ba onno room-e.

31 October (Sat) – Day 0: Foundation sprint

Dhorchi tumi ~14:00-e shuru korbe. Jodi aro late hoy → Block 4 (high-low) Nov 1 sokal 06:45-e niye jabe.

Time	Block	Ki korbe (kotha theke)
14:00–14:30	Setup	Calculator STAT (A+BX) mode shikho · notebook-e 3 ta section: **Formula sheet / Error log / Rough** · Q&A PDF-e topic page bookmark (Part 4-er page numbers).
14:30–16:30	Block 1 (2 h) Cost language + COGM	Garrison Ch1 (p24): DM/DL/MOH, product vs period, direct/indirect, variable/fixed. Schedule of COGM exhibit. Q&A p8-11 (answers pora). Solve: **Q35 Mason (p32)**, **Q30 (p25)**, **Q36 XYZ (p34)**.
16:30–16:45	Break	Pani, walk. Phone na.
16:45–19:00	Block 2 (2h15) Job-order costing I	Garrison Ch2 (p67). POHR, applied OH, job cost, departmental rates. Q&A p42-47. Guided: **Q42 High Desert Pottery (p43)**. Blind: **Q55 (p71)**, **Q43 Teledex (p44)**.
19:00–20:15	Meal + prayer	Halka walk. Kono problem na.
20:15–22:15	Block 3 (2 h) Job-order II	Journal entries & T-accounts, under/over-applied adjust (Garrison Ch3 p110). Guided: **Q47 Polaris (p53)**. Blind: **Q52 Luzadis (p68)**, **Q54 White (p69)**.
22:15–23:00	Block 4 (45 min) High-low	High-low formula + cost formula Y = a + bX. Solve **Q28 Lakeshore (p22)**, **Q26 (p20)**. Regression: calculator-e **Q27 (p21)** try koro.
23:00–23:20	Recall	Blank page-e: COGM chain, POHR formulas, under/over rule, high-low – memory theke. Error log update.
23:30	Sleep	Phone dure. 6:30 uthbe.

Target: 6 solved problems, formula sheet #1 (1 page), error log-e minimum 5 entry.

1 November (Sun) – Day 1: CVP → Var/Abs → Process

Peak-energy slot (07:00-13:30) e CVP + Var/Abs: eder logic ekta onno-r upor dependent.

Time	Block	Ki korbe (kotha theke)
06:30–07:00	Wake	Fresh, halka breakfast. 10 min: gotokal-er formula sheet-e chokh bulano.
07:00–09:00	Block 1 CVP concept	Garrison Ch5 (p196): CM, CM ratio, BE, target profit, MOS, DOL, what-if changes. Q&A p152-158. Guided: **Q123 Superior Door (p157)**. Blind: **Q124 Hermann (p157)**.
09:00–09:15	Break	
09:15–11:15	Block 2 CVP practice	**Q126 PEM (p158)** – 3x repeated case! **Q131 Feather Friends (p165)**, **Q127 Memofax (p161)**, **Q122 Cricket balls (p155)**. 15 min: 5-mark theory (Q116, Q121, Q135).
11:15–11:30	Break	
11:30–13:30	Block 3 Var/Abs I	Garrison Ch6 (p257) – *sudhu variable costing part*. Q&A p122-152. Guided: **Q102 Fine Producers (p131)**. Blind: **Q103 Lynch (p133)**. Reconciliation formula mukhosto koro.
13:30–14:45	Meal + nap	Lunch, prayer, 20 min power-nap (alarm!).
14:45–16:45	Block 4 Var/Abs II	**Q105 Tami's (p136)**, **Q110 Heaton (p143 – reverse)**, **Q98 Denton (p126)**. Theory 5-10 marks: Q101, Q108, Q114 (p130, p141, p150).
16:45–17:15	Break	Chai, walk, sunlight.
17:15–19:15	Block 5 Process costing I	Garrison Ch4 (p154): 5-step method, equivalent units, cost per EU (weighted average). Q&A p77-102. Guided: **Q61 Lindex (p80)**. Blind: **Q67 Builder (p88)**.
19:15–20:15	Meal + prayer	
20:15–22:15	Block 6 Process II	**Q64 San Jose (p83)**, **Q68 Martin (p89)**, **Q70 Luxguard (p92 – 2 dept)**. Theory: Q58, Q73 (p77, p98).

Time	Block	Ki korbe (kotha theke)
22:15–22:45	Recall	Blank page recall: CVP formulas, absorption-variable reconciliation, EU recipe. Error log.
22:45–23:00	Plan	Kal-er first problem-gulo desk-e rakho. Sleep 23:00.

Target: 12 problems (4 CVP, 4 Var/Abs, 4 Process) + 5 short theory answers. Formula sheet #2 done.

2 November (Mon) – Day 2: Relevant costs → Master budget → ABC

Aji sob problem-e **"decision"-er sentence** likhbe: "Accept/Reject because ...". Eta marks.

Time	Block	Ki korbe (kotha theke)
06:30–07:00	Wake	Fresh + 10 min recall of Day 1 formula sheet.
07:00–09:00	Block 1 Relevant I	Garrison Ch12 (p560): relevant/sunk/opportunity, 6 decision types. Q&A p172-188. Guided: **Q139 Climate Control (p173 make/buy)**. Blind: **Q145 Glade (p178 special order)**.
09:00–09:15	Break	
09:15–11:15	Block 2 Relevant II	**Q148 Pegasus drop flight (p180)**, **Q149 Walton Toy (p182)**, **Q147 Benoit constraint (p179)**, **Q141 Come-Clean (p174 process further)**.
11:15–11:30	Break	
11:30–13:30	Block 3 Master budget I	Garrison Ch8 (p362): sales → production → DM purchases → cash collections → cash budget. Q&A p188-209. Guided: **Q161 Hareston (p194)**. Blind: **Q171 Zan (p205)**.
13:30–14:45	Meal + nap	
14:45–16:45	Block 4 Master budget II	**Q166 Mynor (p199)**, **Q169-170 Milo (p203-204)**, **Q173 Pearl Products (p207)**. Draw master-budget diagram (Q163/164, p196-197) 2 bar.
16:45–17:15	Break	
17:15–19:15	Block 5 ABC	Garrison Ch7 (p310): activity rate = pool cost ÷ driver. Q&A p102-122. Guided: **Q85 Advanced Products (p110)**. Blind: **Q88 Thermal Rising (p113)**, **Q91 Fogerty (p116)**. Theory Q80/Q82 (p105, p107).
19:15–20:15	Meal + prayer	
20:15–22:15	Block 6 Mixed retrieval	6 blind problems × 20 min: **CVP (Q131)**, **Var/Abs (Q103)**, **Process (Q69)**, **Relevant (Q142 p175)**, **Budget (Q169)**, **ABC (Q87 p112)** – ekdom exam-condition, answer dekho na. Interleaving = long-term memory.
22:15–22:45	Recall	Formula sheet #3. Error log update. Prottek topic-er 1 "trap" likho.
22:45–23:00	Plan	Sleep 23:00.

Target: 14 problems, master-budget diagram, ABC 2-stage recipe, formula sheet #3.

3 November (Tue) – Day 3: Ratios/ROI → Std → Flex → CapBud → Mock 1

Aji naya topic shesh – kal theke **kono new topic na**. Aji-r sheshe full syllabus-e tomar hat porbe.

Time	Block	Ki korbe (kotha theke)
06:30–07:00	Wake	Fresh + 10 min recall.
07:00–09:15	Block 1 Ratios I	Garrison Ch15 (p725) + Ch11 ROI/RI (p506). Ratio formula table ekbar lekho. Q&A p228-249. Guided: **Q204 Castile (p247)**. Blind: **Q193 ROI (p233)**, **Q195 (p235)**.
09:15–09:30	Break	
09:30–11:00	Block 2 Ratios II	**Q201 Joel de Paris (p243)**, **Q196 Sabin (p236)**, **Q192 Plunge (p232)**. 15 min cash-flow theory: Q197, Q199 (3 sections, cash equivalents).
11:00–11:15	Break	
11:15–13:00	Block 3 Std variances	Garrison Ch10 (p449). 6 variances, SQ = std qty × *actual output*. Q&A p218-228. Guided: **Q185 Xavier (p223)**. Blind: **Q187 (p225)**, **Q189 Koontz (p226)**.
13:00–14:15	Meal + nap	
14:15–15:30	Block 4 Flexible budget	Garrison Ch9 (p413). Q&A p209-218. Guided: **Q174 Milano (p209)**. Blind: **Q176 Via Gelato (p212)**, **Q178 Gourmand (p216)**.

Time	Block	Ki korbe (kotha theke)
15:30–15:45	Break	
15:45–17:15	Block 5 Capital budgeting	Garrison Ch13 (p632). NPV, annuity factor, IRR, payback. Q&A p249-253. **Q208 IRR (p252)**, **Q205 Tiger (p249)**, **Q206 (p249)**.
17:15–18:00	Block 6 Process FIFO	FIFO EU formula. **Q71 Selzik (p94)**. (Cut ladder: eta prothome kata jay.)
18:00–19:00	Meal + prayer	
19:00–19:30	Theory sprint	MCE/throughput (Q1 p3, Q6 p5), ABC levels (Q90 p116), cost concepts (Q12, Q13 p10).
19:30–21:30	Mock 1 (2 h)	**2023-24 Section A:** Q1 (Q172 + Q7), Q2 (Q188 + Q177), Q3 (Q93 + Q150), Q4 (Q151 + Q207) – **any 3 questions in 100 min**, baki 20 min check. Answer-gulo Q&A-te moder answer-er sathe milao.
21:30–22:15	Recall + log	Sob formula sheet 1 jaygay (#1-#3 + aji). Error log: top 10 recurring mistakes mark koro.
22:15	Sleep prep	Sleep 22:45.

Target: 100% syllabus covered once, Mock 1 score ≥ 70%, error log 25+ lines.

4 November (Wed) – Revision day

Detail strategy Part 6-e. Kono new topic na. Phone-e kono group chat na.

Time	Block	Ki korbe (kotha theke)
06:30–07:00	Wake	Fresh + breakfast.
07:00–08:30	R1 (1.5 h) Blank-page recall	Part 5 checklist-ta cover kore, 11 ta numerical topic-er formula ar steps **memory theke** lekho. Missing item-gulo red pen-e. Tarpor fix.
08:30–08:45	Break	
08:45–10:45	R2 (2 h) Error-log re-solve	Error log theke 6-8 ta problem ekdom aborar solve (same problem, blank page, answer chhara).
10:45–11:00	Break	
11:00–13:00	R3 (2 h) Speed round	11 numerical topic × 10-11 min: prottek topic-e ekta *notun* problem (nij-er pochondo) – only setup (formula/step) ar first 3 calculation line, tarpor answer dekho.
13:00–14:30	Meal + nap	
14:30–16:30	R4 (2 h) Mock 2	**2024-25 Section B:** Q5 (Q135, Q14, Q113), Q6 (Q57, Q75), Q7 (Q136, Q202), Q8 (Q203, Q204, Q114) – any 3 in 100 min; 20 min check.
16:30–17:00	Break	Walk, sunlight.
17:00–18:30	R5 (1.5 h) Theory sprint	12 short answers (5-line format): master budget + diagram · ABC benefits/limits/steps · var vs absorption · job vs process · relevant/sunk/opportunity · operating leverage · MCE · product vs period · participative budget · cash equivalents · standard cost use · Why POHR.
18:30–19:30	Meal + prayer	
19:30–21:00	R6 (1.5 h) Weak-topic repair	Mock 1 + Mock 2 theke 2 ta weakest topic: prottek-e 1 full problem + worked answer line-by-line.
21:00–21:30	Final scan	Shudhu formula checklist (Part 5) ar traps. Problem solve na.
21:30–22:00	Bag + sleep	Calculator (batteries), admit card, 3 pen, pencil, scale, water. **22:00 sleep**.

Target: all formulas written from memory with 0 gaps; Mock 2 score ≥ 80% of attempted marks.

5 November (Thu) – Exam day

Dhorchi exam-er shomoy tumi jano. Time-gulo exam-er start theke back-calculate koro.

Time	Block	Ki korbe (kotha theke)
T – 3:30	Wake	Breakfast, pani. Bag recheck.
T – 2:45	40 min scan	Part 5 formula checklist-e chokh bulao. **Ekta-o notun problem solve korba na.**
T – 1:45	Leave	Early reach. Seat-e bose breathing, 5 min.
T – 0:10	Quiet	Peer-der sathe topic discuss na. Formula comparison kore ghabhrabe na.
T → T+3:00	Exam	Part 6-er exam-hall strategy.

Part 4 · Topic playbooks (study order-e)

Prottek topic-e 7 ta jinis: kotha theke porbo · concepts · formulas · problem types · exam weight · practice order · traps. **Q-number** = Q&A bank-er entry number (jemon Q35), **p** = oi Q&A PDF-er page number. "Mock-reserve" = latest-ta mock-er jonno rakhbe; age purono instance practice koro.

Cost language, COGM & income statement (Topics 2 + 4)

TIER B · IMPORTANT
Oct 31 · Block 1 · 2 h

Kotha theke porbo	Q&A **p8-11** (cost concepts), **p25-41** (COGM schedules). Garrison **Ch1 (p24)** – cost classifications + Schedule of COGM exhibit.
Ki ki concept bujhte hobe	• Manufacturing cost = **DM + DL + MOH**; selling & admin = **period cost** (never in inventory). • Direct vs indirect (traceable?), variable vs fixed (behavior), product vs period (inventory?). • Inventory flow: **Raw materials → WIP → Finished goods → COGS**. • Differential, sunk, opportunity cost – ekta ekta example mukhosto (Relevant-cost-er jonno).
Formulas – memorize	• DM used = Beg RM + Purchases − End RM • Total mfg cost = DM used + DL + MOH • COGM = Total mfg cost + Beg WIP − End WIP • COGS = Beg FG + COGM − End FG • Gross margin = Sales − COGS; NOI = GM − (Selling + Admin) • Prime cost = DM + DL; Conversion cost = DL + MOH
Mathematical problem-er dhoron	• Ekta list-e 10-14 cost item thake → sob bag-e fele **Schedule of COGM + Income statement** (Q35 Mason repeated 3x). • Missing figure ber kora (Q39). Overtime premium & idle time = MOH (Q10).
Exam-e question type & weight	5-12 mark **theory** ashe nearly every Section-B Q5: product vs period (Q12), 3 elements of product cost (Q13), differential/opportunity/sunk (Q14). COGM numerical 2018-19 theke nei – tai depth-e jabe na.
Practice order (Q = bank no., p = Q&A page)	Q35 (p32) → Q30 (p25) → Q36 (p34); theory Q12, Q13, Q14 (p10-11).
Common traps	Factory depreciation = MOH, office depreciation = admin. Indirect material/labor → MOH. COGM-e selling expense dhukabe na. WIP adjust-er sign.

Job-order costing & overhead (Topic 5)

TIER A · MUST
Oct 31 · Blocks 2-3 · 4 h 15 m

Kotha theke porbo	Q&A **p42-76** (16 entries). Garrison **Ch2 (p67)** unit cost & POHR, **Ch3 (p110)** cost flows, journal, under/over.
Ki ki concept bujhte hobe	• Kano **predetermined** rate? Actual OH year-end-e jana jay; unit cost smooth rakha (Q53 – 8 mark theory). • Job cost sheet: DM + DL + **applied** OH. Departmental rate = prottek department-er nijer rate + nijer base. • Under/over-applied OH: end-of-period-e COGS-e adjust (simple) ba WIP/FG/COGS-e prorate (adjusted). • Cost-plus pricing: bid price = total cost + markup.
Formulas – memorize	• **POHR = Estimated total MOH ÷ Estimated total base** (MH / DLH / DL$) • Applied MOH = POHR × **actual** base used • Job cost = DM + DL + Applied MOH; Unit cost = Job cost ÷ Units • Under(+)/Over(−) = Actual MOH − Applied MOH • Underapplied: Dr COGS, Cr MOH. Overapplied: Dr MOH, Cr COGS • Entries: Dr WIP/Cr RM · Dr MOH/Cr RM (indirect) · Dr WIP/Cr Wages · Dr WIP/Cr MOH (applied) · Dr FG/Cr WIP · Dr COGS/Cr FG • Price = Total cost × (1 + markup %)
Mathematical problem-er dhoron	• **2-department POHR** (Molding = MH, Painting = DLH/DL cost) → Job A & B cost → bid → under/over per department (Q42, Q55, Q57 High Desert Pottery; Q54, Q56). • Comprehensive **journal-entry/T-account** problem with beginning & ending inventories (Q41, Q47, Q50, Q52).
Exam-e question type & weight	**All 13 papers.** Last 3: 20 / 22 / 20 marks in Section B-Q6. Almost always *Job-order (a)* + *Process costing (b)* in same question.
Practice order (Q = bank no., p = Q&A page)	Q42 (p43) → Q55 (p71) → Q54 (p69) → Q47 (p53) → Q52 (p68) → Q49 (p57). **Mock-reserve:** Q57 (p74), Q56 (p72).
Common traps	Rate-e *estimated*, apply-e *actual* hours. Department-wise alada base. Under/over sign. Early rounding na (rate 2-3 decimal).

Cost behavior & high-low (Topic 3)

TIER B · IMPORTANT
Oct 31 · Block 4 · 45 min

Kotha theke porbo	Q&A **p12-24**. Garrison **Ch5 (p196)** opening sections (cost behavior, mixed cost, high-low, regression).
Ki ki concept bujhte hobe	• Variable / fixed / mixed / step cost; **relevant range**. • Cost formula Y = a + bX (a = fixed, b = variable/unit). • Regression: calculator STAT → slope b, intercept a. (Hand formula bad.)
Formulas – memorize	• **$b = (Y_{high} - Y_{low}) \div (X_{high} - X_{low})$** • $a = Y_{high} - b \times X_{high}$ • Predicted cost = a + b × X
Mathematical problem-er dhoron	• Monthly activity vs cost table → high-low → cost formula → predict cost at new activity (Q28, Q24, Q15). • Regression by calculator (Q27, Q22).
Exam-e question type & weight	14-25 marks about every 2nd paper (22-23: 29 marks in Q5). 5-6 mark theory: step-variable, relevant range, semi-variable (Q17, Q20, Q21).
Practice order (Q = bank no., p = Q&A page)	Q28 (p22) → Q26 (p20) → Q27 (p21). Theory Q20/21 (p16).
Common traps	High/low point **activity** dhore, cost dhore na. Same-month pair use koro. Unit-gulo thik kora (thousands).

Cost-Volume-Profit (CVP) (Topic 9)

TIER A · MUST
Nov 1 · Blocks 1-2 · 4 h

Kotha theke porbo	Q&A **p152-171** (20 entries). Garrison **Ch5 (p196)** – CVP exhibits, BE, target profit, MOS, DOL, sales mix.
Ki ki concept bujhte hobe	• Contribution margin = ki baki thake fixed cost cover korte; BE = profit zero. • **"Treat each change independently"** problem: prottek proposal-e Δ(CM) vs Δ(fixed). • Operating leverage: fixed cost beshi ⇒ profit sales-er sathe beshi nore. • Contribution-format income statement.
Formulas – memorize	• CM/unit = SP − VC; CM ratio = CM ÷ Sales = 1 − VC ratio • **BE units = Fixed ÷ CM/unit; BE $ = Fixed ÷ CM ratio** • Target units = (Fixed + Target profit) ÷ CM/unit; after-tax: pre-tax profit = After-tax ÷ (1 − t) • MOS $ = Sales − BE sales; MOS % = MOS ÷ Sales • **DOL = CM ÷ NOI; %ΔNOI = DOL × %ΔSales** • Ad-spend test: ΔCM = Δsales × CM ratio vs Δfixed • Mix BE: Fixed ÷ weighted-average CM/unit
Mathematical problem-er dhoron	• Basic: CM, profit at X units, BE (units, $), target profit units (Q123, Q131). • What-if: ad budget up, price down, quality materials, fixed→variable switch, new equipment (Q124, Q126, Q127, Q130, Q136). • DOL / MOS interpretation (Q115, Q120, Q122).
Exam-e question type & weight	**20-35 marks nearly every paper.** Last 3: Q8(a) 20 · Q7(b) 25 (+5+5) · Q7(a) 25 (+8). Plus 5-mark theory: operating leverage, CM ratio, BE significance (Q116, Q118, Q121, Q132-135).
Practice order (Q = bank no., p = Q&A page)	Q123 (p157) → Q124 (p157) → **Q126 PEM (p158)** → Q131 (p165) → Q127 (p161) → Q122 (p155). **Mock-reserve:** Q130, Q133, Q136 (same case family).
Common traps	"Independent" mane original data-te fire jaua. %-change vs absolute change mix kora. Fixed cost-e depreciation include. Tax-er jonno (1 − t).

Variable vs Absorption costing (Topic 8)

TIER A · MUST
Nov 1 · Blocks 3-4 · 4 h

Kotha theke porbo	Q&A **p122-151** (19 entries). Garrison **Ch6 (p257)** – variable costing part only.
Ki ki concept bujhte hobe	• Absorption: fixed MOH **product cost** (inventory-te jay). Variable: fixed MOH **period cost**. • Production > Sales ⇒ inventory build ⇒ absorption NOI **higher**. Production < Sales ⇒ variable higher. Equal ⇒ same (Q114). • Dui format-er income statement: **Gross margin format** vs **Contribution format**.
Formulas – memorize	• Absorption unit cost = DM + DL + VOH + **Fixed MOH ÷ units produced** • Variable unit cost = DM + DL + VOH • **$NOI_{abs} - NOI_{var}$ = (Δ inventory units) × fixed MOH/unit = Fixed OH deferred in (ending) − released from (beginning)** • Absorption: Sales − COGS = GM − S&A. Variable: Sales − (Var COGS + Var S&A) = CM − Fixed (MOH + S&A)
Mathematical problem-er dhoron	• Two-year / one-year income statements both ways + reconcile (Q102, Q103, Q105, Q111, Q113). • Reverse: given absorption NOI & units → variable NOI (Q110 Heaton). • FIFO inventory layers (Q100, harder – skip first).
Exam-e question type & weight	**13/13 papers.** Last 3: 15 · 18+7 · 15+10. Theory 5-10 marks: "difference between var & abs" (Q96, Q99, Q101, Q108, Q112, Q114).
Practice order (Q = bank no., p = Q&A page)	Q102 (p131) → Q103 (p133) → Q105 (p136) → Q110 (p143) → Q98 (p126). **Mock-reserve:** Q111 (p146), Q113 (p149).
Common traps	Fixed MOH rate = Fixed ÷ **production** (sales na). Selling & admin ke inventory-e dhukabe na. Reconciliation-e sign: production > sales hole abs. bigger.

Process costing (Topic 6)

TIER A · MUST
Nov 1 · Blocks 5-6 (4 h) + Nov 3 FIFO 45 min

Kotha theke porbo	Q&A **p77-101** (18 entries). Garrison **Ch4 (p154)** – 5-step method, weighted-average first.
Ki ki concept bujhte hobe	• Job-order = alada job; Process = continuous, similar units → **unit costs by averaging** (Q58, Q73, Q74 theory). • **Equivalent units (EU)**: materials & conversion **alada** hishab. Transfer-in (2nd department) = 100% complete. • 5 steps: (1) units flow (2) EU (3) total cost to account for (4) cost per EU (5) cost transferred & ending WIP + reconciliation.
Formulas – memorize	• **WA: EU = Units transferred out + Ending WIP × %complete** • WA: Cost/EU = (Beg WIP cost + Cost added) ÷ EU • FIFO: EU = Beg WIP × (1 − %done) + Started & completed + End WIP × %done • FIFO: Cost/EU = Cost added this period ÷ EU • Transferred cost = Units × (Mat/EU + Conv/EU); Ending WIP = EU_{mat} × rate + EU_{conv} × rate • Check: Cost transferred + Ending WIP = Total cost to account for
Mathematical problem-er dhoron	• Single department weighted-average, materials at start / conversion uniform (Q59, Q61, Q65, Q67, Q68, Q69). • Two departments with transfer-in cost (Q70 Luxguard). • FIFO (Q71, Q75 Selzik). Plus selling price/unit profit (Q64).
Exam-e question type & weight	**13/13 papers; 35 marks until 2020-21**, recently 15 (Q6(b)) + 7-8 theory. Section B-Q6 e Job-order-er sathe.
Practice order (Q = bank no., p = Q&A page)	Q61 (p80) → Q67 (p88) → Q64 (p83) → Q68 (p89) → Q69 (p91) → Q70 (p92) → FIFO: Q71 (p94). **Mock-reserve:** Q75 (p99), Q72.
Common traps	Materials 100% at start ⇒ ending WIP materials EU = full units. Conversion EU alada. FIFO-te beginning WIP-er "already done" part bad. Reconciliation mela.

Relevant costs & managerial decisions (Topic 10)

TIER A · MUST
Nov 2 · Blocks 1-2 · 4 h

Kotha theke porbo	Q&A **p172-187** (16 entries). Garrison **Ch12 (p560)** – Key Concepts, special order, drop, make/buy, constraints, process further.
Ki ki concept bujhte hobe	• **Relevant = future + differs** between alternatives. Sunk, allocated (unavoidable) fixed cost = irrelevant. • Opportunity cost = ya chere deya benefit (capacity limited hole add koro). • Final line-e always **decision sentence** likho ("Keep Linens because …").
Formulas – memorize	• **Drop segment:** Advantage = Avoidable fixed cost saved − Lost CM (keep if lost CM > savings) • **Make or buy:** Buy price vs avoidable cost to make (DM + DL + VOH + avoidable fixed) (+ opp. cost) • **Special order:** Δprofit = Qty × (Offer price − Incremental unit cost); at full capacity subtract lost CM • **Constraint:** Rank by CM per constrained unit (CM/unit ÷ DLH/unit), fill demand highest-first • **Sell or process further:** Incremental revenue − Extra processing cost (joint cost ignore)
Mathematical problem-er dhoron	• Drop a product/flight/department (Q140, Q148, Q152). • Special order (Q145, Q153); Make-or-buy (Q139); Constrained resource / product mix (Q143, Q147, Q149, Q151); Sell vs process further (Q141, Q150); Close temporarily (Q142).
Exam-e question type & weight	**Biggest recent-weight topic:** 70 (22-23) · 35 (23-24) · 30 (24-25). Section A-Q3/Q4-e 15-35 marks. Theory 10: which costs matter when dropping (Q137), define relevant/sunk (Q138).
Practice order (Q = bank no., p = Q&A page)	Q139 (p173) → Q145 (p178) → Q148 (p180) → Q149 (p182) → Q147 (p179) → Q141 (p174) → Q142 (p175). **Mock-reserve:** Q150, Q151, Q152, Q153.
Common traps	Allocated fixed cost kate diyo na. Depreciation of existing equipment = sunk. Capacity full ⇒ opportunity cost. "Avoidable" shobdo dekho.

Master budget & cash budget (Topic 11)

TIER A · MUST
Nov 2 · Blocks 3-4 · 4 h

Kotha theke porbo	Q&A **p188-208** (18 entries). Garrison **Ch8 (p362)** – schedules chain + cash budget exhibit.
Ki ki concept bujhte hobe	• Chain: **Sales → Production → DM purchases → DL / MOH → S&A → Cash budget → Budgeted statements**. • Cash budget-e **non-cash** (depreciation) bad; collections lag (e.g., 70% same month, 30% next). • Theory (5-15 marks): master budget + diagram, self-imposed/participative vs top-down, benefits.
Formulas – memorize	• **Production units = Sales + Desired ending FG − Beginning FG** • Materials needed = Production × RM/unit • **Purchases = Needs + Desired ending RM − Beginning RM** • Collections = Σ (sales of month × collection %) • Payments = Σ (purchases × payment %) • Cash before financing = Beg cash + Collections − Disbursements • Interest = Principal × annual rate × (months ÷ 12); Ending cash ≥ minimum cash
Mathematical problem-er dhoron	• Production + DM budget (Q161, Q171, Q173). • Collections & payments schedule → full quarterly cash budget with borrowing/repayment (Q155, Q157, Q162, Q166, Q168, Q169-170).
Exam-e question type & weight	**Section A-Q1 compulsory-looking: 20 marks every paper (22-23, 23-24, 24-25).** + 10-15 theory (Q154-165).
Practice order (Q = bank no., p = Q&A page)	Q161 (p194) → Q171 (p205) → Q166 (p199) → Q169-170 (p203) → Q173 (p207) → Q162 (p195). Theory: Q163/164 diagram (p196-197), Q165, Q156. **Mock-reserve:** Q172 (p206).
Common traps	Opening vs closing inventory-r sign. Month alignment (collection lag). Borrow in multiples (reading). Interest on borrowed-in-which-month. Depreciation exclude.

Activity-based costing (Topic 7)

TIER A · MUST
Nov 2 · Block 5 · 2 h

Kotha theke porbo	Q&A **p102-121** (17 entries). Garrison **Ch7 (p310)** – 2-stage ABC, activity levels, customer profitability.
Ki ki concept bujhte hobe	• Traditional: ekta base (DLH). ABC: activity pool-wise **driver** (orders, batches, designs, customers). • Stage 1: resource cost (wages) ke % diye pool-e ber koro. Stage 2: **rate = pool cost ÷ driver total**. "Other" pool = unallocated. • Levels: unit, batch, product, customer, organization-sustaining (Q90).
Formulas – memorize	• **Activity rate = Total cost of pool ÷ Total driver quantity** • Overhead to product/customer = Σ (rate × driver used) • Unit cost (ABC) = (DM + DL + allocated OH) ÷ Units • Customer margin = Revenue − Product cost − Customer-driven ABC cost • Traditional rate = Total OH ÷ Total DLH
Mathematical problem-er dhoron	• Compute activity rates, cost of an order/customer, margin (Q85, Q88, Q92-94, Q76). • Traditional vs ABC unit cost for 2 products (Q83, Q91 Fogerty). • Stage-1 allocation of wages by % (Q77, Q78, Q81, Q85).
Exam-e question type & weight	**12/13 papers.** Last 5: 15 · 20 · 20 · 20 · 20. Theory 5-10: steps, benefits, limitations (Q79, Q80, Q82, Q84).
Practice order (Q = bank no., p = Q&A page)	Q85 (p110) → Q88 (p113) → Q91 (p116) → Q87 (p112). **Mock-reserve:** Q92-94 (Thermal Rising, Advanced Products).
Common traps	Pool-er total check (100%). Customer-level cost shudhu customer-er upor. DLH-er rate vs ABC rate mix koro na.

Financial ratios, ROI & Residual Income (Topic 14)

TIER A · MUST
Nov 3 · Blocks 1-2 · 3 h 45 m

Kotha theke porbo	Q&A **p228-248** (15 entries). Garrison **Ch15 (p725)** ratios; **Ch11 (p506)** ROI & residual income only.
Ki ki concept bujhte hobe	• Liquidity, activity (turnover), profitability, leverage, market ratios. Prottek ratio-r **meaning ek line-e**. • ROI = Margin × Turnover; Residual income = absolute profit above required return. • Statement of cash flows: **theory only** – operating / investing / financing; cash equivalents (Q197, Q199, Q203).
Formulas – memorize	• Working capital = CA − CL; Current ratio = CA ÷ CL • Acid-test = (Cash + Mkt securities + AR + ST notes) ÷ CL • AR turnover = Credit sales ÷ **Avg** AR; Collection period = 365 ÷ AR turnover • Inv. turnover = COGS ÷ Avg inventory; Sale period = 365 ÷ Inv. turnover • Gross margin % = GM ÷ Sales; Net margin = NI ÷ Sales • TIE = EBIT ÷ Interest; Debt/Equity = Total liabilities ÷ Equity • ROA = [NI + Interest × (1 − t)] ÷ Avg assets; ROE = (NI − Pref div) ÷ Avg common equity • EPS = (NI − Pref div) ÷ Avg shares; P/E = Price ÷ EPS; Payout = DPS ÷ EPS; Yield = DPS ÷ Price • **ROI = NOI ÷ Avg operating assets = (NOI ÷ Sales) × (Sales ÷ Avg op. assets)** • **RI = NOI − (Min required rate × Avg operating assets)** • Horizontal %: (Current − Base) ÷ Base; Common-size: item ÷ total
Mathematical problem-er dhoron	• Full ratio set from comparative balance sheet & income statement (Q196, Q198, Q204, Q190, Q192). • ROI, margin, turnover, RI – including missing-value fill (Q193, Q195, Q201). • Trend/variance explanation (Q194 McKenzie).
Exam-e question type & weight	**Fastest-rising topic: 42 → 41 → 50 marks.** Appears in Section A-Q1(b) *and* Section B (Q5/Q7/Q8) – mane ekbar-e duto question-e.
Practice order (Q = bank no., p = Q&A page)	Q204 (p247) → Q193 (p233) → Q195 (p235) → Q201 (p243) → Q196 (p236) → Q192 (p232) → Q194 (p234). **Mock-reserve:** Q198 (p239), Q202 (p245).
Common traps	**Average** balance (beginning + ending ÷ 2). ROI-te **operating assets** – land held for future, investments in other company bad (Joel de Paris). Credit sales only. Time-period (365) consistent.

Standard costs & variances (Topic 13)

TIER B · IMPORTANT
Nov 3 · Block 3 · 1 h 45 m

Kotha theke porbo	Q&A **p218-227** (10 entries). Garrison **Ch10 (p449)**.
Ki ki concept bujhte hobe	• Standard cost card: std qty × std price per unit of output. • Price/rate variance (ki dam dilam) vs Quantity/efficiency variance (kotota lagche). • Favorable / Unfavorable: cost-e actual > standard = **U**.
Formulas – memorize	• **MPV = AQ purchased × (AP − SP)** • **MQV = SP × (AQ used − SQ allowed)** • **LRV = AH × (AR − SR)** • **LEV = SR × (AH − SH allowed)** • VOH rate = AH × (AR − SR); VOH efficiency = SR × (AH − SH allowed) • **SQ / SH allowed = Std per unit × ACTUAL output** • Total = Actual cost − Standard cost for actual output
Mathematical problem-er dhoron	• Calculate 4-6 variances + F/U + explain (Q179, Q182, Q185, Q187, Q189). • Compute standard cost card + variances for service (Q188 hospital). • Reverse: missing standard/hours from given variance (Q181, Q186 – optional).
Exam-e question type & weight	15-27 marks in 10 of 13 papers; 20 marks in each of the last 2 papers (Section A-Q2/Q3).
Practice order (Q = bank no., p = Q&A page)	Q185 (p223) → Q187 (p225) → Q189 (p226) → Q179 (p218). Optional: Q181, Q186. **Mock-reserve:** Q188 (p226).
Common traps	Price variance **purchased** qty-te, quantity variance **used** qty-te. Allowed qty actual output diye. F/U-er sign.

Flexible budgets & performance reports (Topic 12)

TIER B · IMPORTANT
Nov 3 · Block 4 · 1 h 15 m

Kotha theke porbo	Q&A **p209-217** (4 entries). Garrison **Ch9 (p413)**.
Ki ki concept bujhte hobe	• Planning budget (original) vs Flexible budget (actual activity-te) vs Actual. • Activity variance = volume-er karone; Spending/Revenue variance = performance. • Cost drivers more than one (courses, students) – Q178.
Formulas – memorize	• **Flexible budget cost = Fixed + Variable rate × actual activity** • **Activity variance = Flexible budget − Planning budget** • **Revenue / Spending variance = Actual − Flexible budget** • Performance report columns: Actual | Variance | Flexible | Activity var | Planning
Mathematical problem-er dhoron	• Planning budget + flexible budget + variances + F/U + comment (Q174, Q176, Q177, Q178).
Exam-e question type & weight	**4 of the last 5 papers**: 35 · 15 · 15 · 20 – Section A-Q2.
Practice order (Q = bank no., p = Q&A page)	Q174 (p209) → Q176 (p212) → Q178 (p216). **Mock-reserve:** Q177 (same as Q176).
Common traps	Revenue flex hoy actual units-er sathe. Variable vs fixed cost alada. Variance sign: revenue-te actual>flex = F; cost-e actual>flex = U.

Capital budgeting (Topic 15)

TIER B · IMPORTANT
Nov 3 · Block 5 · 1 h 30 m

Kotha theke porbo	Q&A **p249-253** (4 entries). Garrison **Ch13 (p632)** – NPV, IRR, payback, simple rate of return.
Ki ki concept bujhte hobe	• Time value of money: ajker taka > kal-er taka. Discount rate = required return. • Project accept: NPV > 0 / IRR > required rate / payback < cut-off. • Incremental cash flows only: initial investment − sale of old, + working capital release, + salvage.
Formulas – memorize	• **NPV = Σ $CF_t \div (1 + r)^t$ − Investment** • Annuity factor = $[1 - (1 + r)^{-n}] \div r$ • **IRR:** Investment ÷ Annual CF = Annuity factor → r (interpolate) • Payback = Investment ÷ Annual net cash inflow • Simple rate of return = (Annual cash inflow − Depreciation) ÷ Initial investment • Profitability index = NPV ÷ Investment
Mathematical problem-er dhoron	• NPV of 5-year project with varying benefits (Q207). • IRR for annuity (Q208). • New machine vs old: incremental NPV (Q205). • Theory: payback, NPV, IRR (Q206).
Exam-e question type & weight	15 marks in 3 of last 4 papers (Section A-Q2/Q4(b)); 35 once (2020-21).
Practice order (Q = bank no., p = Q&A page)	Q208 (p252) → Q205 (p249) → Q206 (p249). **Mock-reserve:** Q207 (p250).
Common traps	Present-value table exam-e dewa hoy kina check koro – na hole formula calculator-e. Depreciation cash na – NPV-te bad. Year-0 investment discount hoy na.

Foundations, MCE & quick theory (Topics 1 + short answers)

TIER C · QUICK THEORY
Nov 3 · 30 min + Nov 4 · theory sprint 1.5 h

Kotha theke porbo	Q&A **p3-7** (MCE, business environment, balanced scorecard). Theory answers from topic pages above.
Ki ki concept bujhte hobe	• Throughput time = Process + Inspection + Move + Queue (wait **chhara**); Delivery cycle = Wait + Throughput. • MCE = Value-added (process) time ÷ Throughput time. 1 theke boro hote pare na. • Balanced scorecard = Financial, Customer, Internal process, Learning & growth (3 lines enough).
Formulas – memorize	• **Throughput = Process + Inspection + Move + Queue** • **MCE = Process time ÷ Throughput time** • Delivery cycle time = Wait time + Throughput time
Mathematical problem-er dhoron	• Time data → throughput, MCE, non-value-added %, delivery cycle (Q1, Q6).
Exam-e question type & weight	10-15 marks in 6 of 13 papers (23-24: 15 in A-Q1(b)). Easy marks – calculation shudhu 4 line.
Practice order (Q = bank no., p = Q&A page)	Q1 (p3) → Q6 (p5) → Q3 (p3). Theory: Q4 (p4), Q5 (p4).
Common traps	Wait/pre-production time throughput-e dhukabe na. MCE 100% maximum.

Part 5 · Formula & concept checklist

Nov 4 sokal-e **ei page cover kore** blank page-e sob lekhar chesta koro. Ja lekha jay na, oita tick koro na – oita tomar real weak spot.

Cost language / COGM

☐ Product vs period cost; DM, DL, MOH examples	☐ DM used = Beg + Purchases − End	☐ COGM = Mfg cost + Beg WIP − End WIP
☐ COGS = Beg FG + COGM − End FG	☐ Prime = DM + DL; Conversion = DL + MOH	☐ Differential / sunk / opportunity cost definitions

Job-order costing

☐ POHR = Est. MOH ÷ Est. base	☐ Applied = POHR × actual base	☐ Job cost = DM + DL + Applied OH
☐ Under/over = Actual − Applied	☐ Adjust to COGS (+ proration idea)	☐ 6 journal entries (RM → WIP → FG → COGS)
☐ Department-wise rates	☐ Price = Cost × (1 + markup)	

High-low

☐ b = ΔCost ÷ ΔActivity	☐ a = Cost − b × Activity	☐ Y = a + bX; predict

CVP

☐ CM, CM ratio	☐ BE units & $	☐ Target profit units
☐ MOS $ & %	☐ DOL = CM ÷ NOI; %ΔNOI	☐ Ad-budget / price / quality what-ifs (ΔCM vs ΔFixed)
☐ Weighted-avg CM (mix)	☐ After-tax target (÷ 1 − t)	

Variable vs Absorption

☐ Unit cost in each method	☐ Absorption statement (GM format)	☐ Variable statement (CM format)
☐ NOI difference = Δinventory × fixed MOH/unit	☐ Prod > Sales ⇒ Abs higher	☐ Reverse problem: abs → var

Process costing

☐ 5 steps	☐ WA: EU = Transferred + End WIP × %	☐ FIFO: EU formula
☐ Cost per EU (WA vs FIFO)	☐ Transferred vs Ending WIP cost	☐ Reconciliation check

Relevant costs

☐ Relevant = future & differs	☐ Drop: lost CM vs avoidable fixed	☐ Make/buy
☐ Special order (+ opportunity cost)	☐ Constraint: CM per scarce unit	☐ Process further: incremental only

Master budget

☐ Production = Sales + End FG − Beg FG	☐ Purchases = Need + End RM − Beg RM	☐ Collections schedule
☐ Payments schedule	☐ Cash budget layout (borrow/repay/interest)	☐ Master-budget diagram

ABC

☐ Rate = Pool cost ÷ Driver	☐ Stage-1 % allocation	☐ Product/customer overhead
☐ Customer margin	☐ Activity levels (5)	☐ Benefits / limitations

Ratios / ROI

☐ Current, Acid-test	☐ AR turnover, Collection period	☐ Inv. turnover, Sale period
☐ Margin, Asset turnover, ROA, ROE	☐ EPS, P/E, Payout, Yield	☐ TIE, Debt/Equity
☐ ROI = Margin × Turnover	☐ RI = NOI − Rate × Op. assets	☐ Operating-asset definition (exclusions)
☐ Cash-flow 3 sections, cash equivalents		

Std costs / Flex / CapBud

☐ MPV, MQV	☐ LRV, LEV	☐ VOH rate/efficiency
☐ SQ = std × actual output	☐ Flexible budget formula	☐ Activity vs spending variance
☐ NPV + annuity factor	☐ IRR (factor = Inv ÷ CF)	☐ Payback

MCE / theory

☐ Throughput, MCE, delivery cycle	☐ Job vs process costing	☐ Var vs absorption
☐ Operating leverage	☐ Participative budget	☐ Standard cost uses

Problem-solving practice list (master)

✔ Order = oldest → newest. ★ = repeated case (jekono ekta solve korle ba'ki gulo-o easy). **MOCK** = reserve (mock-er age dekho na).

Day	Topic	Solve (Q-bank no. · Q&A page)	Count

Nov 4	Speed round	Each topic-e ekta notun problem + error-log re-solve (6-8)	11 + 8

Total: ~75-80 problems solve + 2 mock. Ekhane protita exam-er-e ashe emon **repeat family**-te cover kora hoyeche.

Recommended study resources (4 din-er jonno)

Resource	Kivabe use korbe	Kivabe use korbe na
IPE-105 Topic-wise Q&A (253 pp)	**Primary.** Topic page → worked answer → blind solve. Answer-er "Model Answer" format-i exam-answer format.	Pura serial-e pora na. Sudhu list-er Q-gulo.
Ipe_2009-25.pdf (scanned papers)	Exam-er original layout dekhte; 2022-23 (Q1/Q5 compulsory), Section A + B format. Mock-e unclear hole original scan check.	Cover pages-er quotes/filler skip. Eta prothom-e pora na.
Garrison 16e (817 pp)	Chapter opening + exhibits + "Review Problem" (end-chapter, solved) = concept clear korar jonno. Chapter starting pages Part 4-e deya.	Pura chapter, cases, "Connect" exercises pora na.
Your notebook	Formula sheet (3 sections), Error log, Rough. Hat-e lekha = recall.	Typing/highlighting recall banay na.
Calculator	STAT (A+BX), memory keys, ^ for annuity factor.	Exam-er age notun calculator adjust korba na.

Part 6 · 4 November revision strategy

Principle: **revise by retrieval, not by reading.** Nov 4-e notun kichu shikhbe na. Tomar goal: **formulas 100% recall + recipe-gulo 100% automatic**.

Slot	Activity	Output
07:00–08:30	**Blank-page recall:** Part 5-er 12 group cover kore likho. Tarpor guide-er sathe milao. Red pen-e gap.	1 clean A4 formula sheet (4 side)
08:45–10:45	**Error-log re-solve:** bhul-er frequency onujayi 6-8 problem aborar blank page-e solve.	Same bhul repeat hocche na
11:00–13:00	**Speed round:** 11 topic × 10 min. Setup + first 3 lines, tarpor milao. Process: "*ki formula? ki input? ki order?*"	Recipe automatic
14:30–16:30	**Mock 2 (2024-25 Sec B):** exam-condition: 100 min, any 3, separate script, calculator only.	Score + timing data
17:00–18:30	**Theory sprint:** 12 short answers 5-line format (definition → 3-4 point → example).	Theory marks secured
19:30–21:00	**Weak-topic repair:** 2 weakest topic, 1 full problem each.	Weak spots reduced
21:00–21:30	**Final scan:** formula checklist + 12 traps (niche). Kono problem na.	Calm brain

Top 12 traps (final scan)

- POHR: estimated base diye rate, **actual** base diye apply.
- Under/over-applied sign: Actual − Applied.
- Fixed MOH/unit = ÷ **production**; NOI diff = Δinventory × fixed rate.
- CVP: "independent" = original data theke start; %-change vs absolute.
- Process: materials vs conversion alada EU; FIFO-te beginning WIP part alada.
- Relevant: allocated fixed cost bad, avoidable fixed include; capacity full ⇒ opportunity cost.
- Budget: purchases = need + **ending** − **beginning**; depreciation cash-e na.
- ABC: rate = pool ÷ driver total; "Other" pool unallocated.
- ROI: **average** operating assets; non-operating assets bad.
- Std: SQ allowed = std × **actual output**; MPV purchased qty-te.
- NPV: depreciation cash na; year 0 undiscounted.
- Final answer-e unit + "accept/reject/F/U" sentence.

Exam-hall strategy

Time budget (180 min, 210 marks): ≈ 0.8 min per mark. 35-mark question ≈ **28 min**. 20-mark part ≈ 16 min · 15 ≈ 12 · 10 ≈ 8 · 5 ≈ 4. Last 10 min = check.

Phase	Ki korbe
0 – 8 min Read & choose	Duto section-er sob question pore dekho. **Compulsory question** age confirm. Choose 3 + 3: **jei part-e formula/recipe chokhe bhasche** oi question. Ekta question-e ekta-i mushkil part thakle bhoy paio na – baki part-e marks nao.
Section order	**Prothome tomar sobcheye strong question** (confidence + marks bank). Tarpor medium. Weakest shesh-e. Separate script – **Section A ar B alada khata-e**, question number sothik.
Writing format	Prottek part: (1) formula likho (2) substitution (3) answer + unit. Schedule/statement hole proper heading + total line. Working dekhao – partial marks. Assumption 1 line-e likho jodi data missing.
Stuck rule	Kono step-e **2 min** atke gele: space chere next part-e jao (carry-forward marks). Last 10 min-e fire asho.
Decision problems	Shesh-e ekta sentence: "Accept the order because incremental profit is X." Eta ekta ekta 1-2 marks.
Theory answer	5 mark = definition (1 line) + 3-4 point + example. 10 mark = 6-7 point/diagram. Master budget/ABC-te **diagram/exhibit** aka.
Calculator & rounding	Intermediate figure rounding korbe na (rate 3-4 decimal), final answer-e round. F/U label dao.
Last 10 min	Question number, units, sign, total check. Missing part-e at least formula + setup likho (setup marks).

Daily completion targets

Day	Must finish before sleep	Check
31 Oct	Cost language + COGM · Job-order (6 problems) · High-low (2 problems) · formula sheet #1 · error log started	☐ ☐ ☐ ☐ ☐
1 Nov	CVP 4+ · Var/Abs 4+ · Process 5 · 5 short theory answers · formula sheet #2	☐ ☐ ☐ ☐ ☐
2 Nov	Relevant 5+ · Master budget 4+ (1 full cash budget) · ABC 3 · diagram drawn · mixed 6 · formula sheet #3	☐ ☐ ☐ ☐ ☐ ☐
3 Nov	Ratios/ROI 5 · Std 3 · Flex 2 · CapBud 3 · FIFO 1 · **Mock 1** · all formulas on 1 combined sheet	☐ ☐ ☐ ☐ ☐ ☐
4 Nov	Blank-page recall done · 6-8 error-log problems · speed round · **Mock 2** · theory sprint · bag packed	☐ ☐ ☐ ☐ ☐ ☐
5 Nov	Formula scan only · early arrival · calm	☐ ☐

If you fall behind: cut ladder

Jodi kono din-er shesh-e **1.5 ghonta+ pichiye** thako, ei order-e kato (upor theke):

- 1) Process FIFO (Q71) – Nov 3 17:15 block. 2) IRR interpolation + discounted payback.
- 3) Std-variance "reverse" problems + Flex budget 2nd problem. 4) ABC theory (benefits/limitations/steps).
- 5) Cost-behavior regression (calculator) – keep high-low only. 6) Mixed retrieval (Nov 2 Block 6) → 1 h.
- **NEVER cut:** Relevant costs · Master/cash budget · CVP · Job-order · Var/Abs · Process (WA) · ABC · Ratios/ROI · Nov 4 recall & mock · sleep.

Last word: 4.00 achieve korte "sob jana" lagbe na – lagbe **tomar strong 3+3 question-ke 85-90% sothik kora**. Ei roadmap tomake oi 8 ta high-weight topic-e exactly eta-i dibe. Shuru koro: **Block 1 – Cost language + COGM (Q35 Mason).**
